EXECUTIVE SUMMARY

The following slides consist on data analysis and visualization of "STACK OVERFLOW DEVELOPER SURVEY" conducted in 2019.

The presentation consist on the findings and implications of:

- Programing Language Trends
- Database Trends
- Current Technology Usage
- Future Technology Trend
- Demographics

INTRODUCTION

- STACK OVERFLOW DEVELOPER SURVEY 2019 make a comprehensive insight of software developers worldwide
- It is conducted by Stack Overflow website and it dives deep into technology preferences, career, as well as demographics

METHODOLOGY

- Data scraping:
 - Source: Stack Overflow Developer Survey 2019
- Data exploration
- Data cleaning
- Data analysis:
 - Programming Language Trends
 - Database Trends
- Data visualization:
 - Graphs
 - Dashboard

RESULTS

The results of this survey are valuable to understand the evolving technologies and developers' preferences.

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

Top 10 Language Worked With

Top 10 LanguageDesireNextYear

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript is the most worked with language and is still on top trending for next year
- Inversely, the usage of C++ and PHP languages are declining among developers
- Python is growing steadily as a desired programming language to learn

Implications

- We can observe GO programming language on top 10 on the "Next Year" graph; it is possible it is replacing C++ since they're syntactically similar.
- SQL is still a high demand language for databases

DATABASE TRENDS

Current Year

Top 10 Database Worked With

DatabaseWorkedWith

- Elasticsearch
- Firebase
- MariaDB
- Microsoft SQL Server
- MongoDB
- MySQL
- Oracle
- PostgreSQL
- Redis
- SQLite

DatabaseDesireNextYear

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- PostgreSQL and MongoDB have been growing among developers
- MySQL and Microsoft SQL Server are still on trend among users comparing both current and next year graphs
- Redis has been growing steadily among developers

Implications

- MySQL and Microsoft SQL Server are losing market as opposed to PostgreSQL and MongoDB
- DynamoDB seems to be the new database language to look for next year

DEMOGRAPHICS

Respondent classified by Gender

Gender
 ● Man ● Woman

Respondent Count for Countries

Country (Count)
 1 2,000

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

EdLevel
 ● (no value) ● Associate degree ● Bachelor's degree (BA, BS, B.Eng,...)
 ● I never completed any formal edu... ● Master's degree (MA, MS, M.Eng,...)
 ● Primary/elementary school ● Professional degree (JD, MD, etc.) ● Other doctoral degree (Ph.D, Ed.D...
 ● Some college/university study wit... ● Secondary school (e.g. American ...

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- The survey more than 90k respondents, with 93.5% of them identifying as men and 6.5% as women, reflecting the gender gap in tech
- JavaScript continued to be the most commonly used programming language, followed by HTML/CSS, SQL, and Python
- React, Vue and Angular are the most desired webframe in the next year

Implications

- The survey emphasizes the ongoing importance of programming languages like JavaScript and Python
- The findings are valuable for both developers seeking to understand industry trends and employers looking to better understand and attract talent

CONCLUSION

- Current Technology Usage: Python and SQL programming languages are still current and trending among developers
- Future Technology: Linux is still growing strong among users, as well as AWS for popular platform
- Demographics: More than 90% of stack developers are men
- Demographics: most of the developers are between 24 and 32 years old

APPENDIX

- According to this graph we can observe most of the stack developers have Bachelor's Degree
- Although a Bachelor's Degree is not mandatory for one who wants to pursue a career as a stack developer, it is still a "nice to have" education level when it comes to job market
